Professional Summary

B.Tech student in AI/ML (2027) with 4+ months of hands-on product experience across an internal stakeholder project and a client project. Authored the proposal and specifications for a Campus Automation system now in active development, and used SQL feature-usage analysis to recommend a Basic-to-Premium pricing structure. Seeking an Associate Product Manager role focused on AI-driven products, combining requirements gathering, data analysis, and machine learning and generative AI knowledge.

Experience

Azentra Global

Nagercoil, Tamil Nadu

Project Coordinator Intern

Sep 2026 – Present

- Authored and pitched a two-phase Campus Automation proposal; secured leadership approval and moved Phase 1 into active development (see Projects).
- Re-scoped the product roadmap after an engineering blocker, prioritizing 4 unblocked MVP features to keep stakeholder reviews on schedule.
- Coordinated 3 concurrent workstreams across 4 cross-functional groups, managing dependencies, risks, and timelines; delivered weekly decision-ready updates to founders, mentors, and technical stakeholders.
- Supported a client project with requirements and documentation, working through my team lead as the client-facing contact; maintained a single source of truth (plans, decisions, risks, owners) for 12+ stakeholders.

Azentra Global

Nagercoil, Tamil Nadu

Business Analyst Intern

Jun 2026 – Sep 2026

- Conducted 10 internal stakeholder interviews across 4 business and technical functions to capture user needs, constraints, and requirements.
- Converted findings into 2 FRDs, 18 user stories, and 45 acceptance criteria for a client project, forming the specification baseline for engineering handoff.
- Mapped 6 end-to-end user journeys and process flows in Miro and Draw.io, aligning stakeholders on edge cases before development.
- Analyzed usage of 15 Basic-tier features in SQL to find upgrade signals; recommended a 25% Basic-to-Premium price differential to reduce feature cannibalization and strengthen upgrade conversion.
- Identified 4 activation friction points over a 3-month analysis, informing a redesigned onboarding flow aimed at improving early feature adoption.

Projects

Campus Automation System – Attendance and Access Management

Product Strategy and Delivery (Internal Stakeholder Project)

Sep 2026 – Present

- **Scope:** ran discovery with 12 stakeholders (administrators, faculty, students, operations); defined the MVP for 4 user groups and 5 core workflows: attendance capture, identity verification, access permissions, reporting, and exception handling.
- **Key decision:** led a build-versus-buy evaluation of 3 approaches; chose established fingerprint and IoT smart-ID technology over custom hardware, reducing pilot risk and accelerating time-to-value.
- **Success metrics:** capture time, manual-entry errors, verification time, adoption rate, admin workload.

Skills

Product: Discovery, Requirements Gathering, FRD/BRD, User Stories, Acceptance Criteria, User Journeys, Roadmap Prioritization, Build-versus-Buy, Pricing and Packaging, Stakeholder Management

AI and ML: Machine Learning, Generative AI, LLMs, NLP, Prompt Engineering

Analytics and Tech: SQL, Python (pandas, NumPy, scikit-learn), Power BI, Zoho Analytics, Advanced Excel

Tools: Jira, Miro, Draw.io, Agile, Scrum

Education and Certification

Joy University

Tamil Nadu, India

B.Tech, Artificial Intelligence and Machine Learning

Expected 2027

Power BI for Beginners (Credential ID: 10174624), May 2026
